rental • assembling • service

20 years
in Ukraine

 **plettac**®

High level service: from the first sight - to the project implementation

Plettac - modern, focused on customer's needs company
Plettac provides service for scaffolding assembling, rental and sell of plettac-assco scaffolding and hoists

More than 20 years we cooperate successful with Ukrainian as well as foreign building-, service-, and restoration companies

The enterprise Plettac (since 1997 to 2003 called MBM-Arnholdt) provides services for projects designing, rental, assembling and sell of scaffolding systems of plettac-assco and hoists.

High quality service, which will be granted by Plettac, includes not only on-time providing with scaffolding and hoists rent exactly also desining, assembly and delivery but first of all the quality and safety works in the compliance with the requirements of DIN EN ISO 9001 standard and other norms for safety and environment protection.

The high scaffolding technological effectiveness ensures safety: use the scaffolding in the chemical industry

Plettac - quality, experience
and reability in
contractual relations

The availability of professionals
and long-term experience
allows us to provide
high quality service of
assembling, rental and sell of
scaffolding and hoists

The chemical industry submits special requirements to scaffolds erection.

The presence of enough quantity the scaffolding allows us to execute a service of the objects regardless of complexity and works amount.

Starting from the installation the scaffolding on the drilling platforms and for piping bridges to the full completing of the oil-refining plants. This range of activity coresponds the possibilities of plettac. High qualification of our employees contributes to this.

The plettac assco scaffolding conform to all valid requirements for running on objects with increased environmental impacts, providing necessary security level.

The high scaffolding technological effectiveness ensures safety: the scaffolding systems in the power industry

Today Plettac is the leader among Ukrainian companies which propose their service for scaffolding erection and hoists installation

There are high quality requirements and quantity of scaffolding elements during the construction such objects as power plants or their units.

There are not difficulties during the construction special or non-standard scaffolding designs for Plettac. We erect our scaffolding designs of any dimension, regardless of a height and level of complexity.

The maintenance the industrial objects needs an erection of difficult designs. We propose safe, simple in servicing plettac-assco scaffolding for such tasks.

The service provision in the industrial sphere provides for the presence of trained specialists and equipment.

The construction and stop of units the power plants for inspection or verification demand special reinforced structures of scaffolding systems. It is necessary to have hundreds of thousand square meters the scaffolding at the warehouse for this.

The amounts of scaffolding systems at the Plettac warehouses allow to satisfy any requirements.

Facades and high-rise buildings: high security level at a height

The Plettac experience accounts more than 3 520 000 square meters the facades of residential and administration buildings, cathedrals, churches and constructions of industrial objects as well

Individual solutions for scaffolding erection on the buildings facades, and also on churches and cathedrals are diverse like these constructions.

The experienced and qualified engineers and erection teams work at Plettac for such tasks solving with minimum expenses of human and material resources.

Regardless of construction's complexity, its dimensions and height, its position above the area, our fitters will erect You constructions which would provide to You favourable and the most safe conditions for works implementation.

The possibility to provide for a Customer the hoists and scaffolding at the same time allows to increase a labor productivity.

Facades and high-rise buildings: high security level at a height

Sufficient work experience of Plettac fitters allows to erect suspension constructions (from top to underside) providing installation of working platforms on any height of building.

Complexity of works implementation at a high demands a careful preparation on the ground. Additional, measures being taken regarding security, comfort work with scaffolding and also measures to protect environmental.

Plettac ascco scaffolding systems allow to erect individual constructions in such way that a work is executed continuously and confidently regardless a height and a season.

Comfortable conditions of work on the scaffolding are providing due to using hard film and net which save a warm air which is warming up with heaters.

The canvas protects fitters against the wind and fallouts. The film is designed for an extended period of operation.

Professional schooling for each Plettac employee

The variety of solving tasks,
rapid development of scaffolding
system technical possibilities
issues high requirements for
professional schooling of both
engineers and fitters

Due the permanent schooling and
upgrading trainings it is possible to
achive the high level of productive
standard. Therefore, qualification of
our certified specialists allows Plettac
to execute erection as of standard
as well as individual scaffolding
constructions in accordance with
the requirements of the Customer
providing minimum expenses.

Our logistic department provides
effective storing and timely delivery
of equipment to the objects in both
territory of Ukraine and abroad.

Our specialists pay special attention to
questions of constructions designing
and planning of assembling and
dismantling implementation. Exactly
the rational designing of scaffolding
constructions and correct logistic
provide our customers with economy
of material resources and time.
Considerable role in the successes
achivement in this way plays enor-
mous experience, which has being
accumulated by our specialists more
than 20 years.

1997-2018

scaffolding **3 520 000** square meters
of assembly
