Clear width up to 9 metres

Innovative design

Integrated LED signalling
and lighting

Heras iGate makes safety extraordinarily attractive.

You can create your own gate by having your own design applied to the panels

iGate

The iGate sets new standards as regards design, functionality and safety. The construction and use of high-quality aluminium guarantee reliability and durability.

The iGate proves that beauty can also be functional. The elegant round shapes of the gate and the column combine with the perforated panels of your design to make an unmistakable statement.

The cantilever construction offers a clear width of 3 to 9 metres and the height of the sliding gate can vary from 1.5 to 2.5 metres. The iGate is available with a gate leaf that slides to the left or to the right. Heras delivers your iGate fully preassembled.
